

18 April 1961

MEMORANDUM FOR: NIS Committee Members

DOCUMENT NO.

SUBJECT: New-type Annuals for FY 1962

11/26/80

No new-type Annuals are considered to warrant scheduling at this time. However, following is a list of areas which, while not warranting Annuals at this time, have existing within them conditions which could generate changes of such magnitude as to justify Annuals at some future date. It is believed that these areas should be kept under surveillance, not only by OBI but also by the producing agencies, and that Annuals should be scheduled on an ad hoc basis as occasions indicate.

<u>NIS No.</u>	<u>Area</u>	<u>Reason</u>
3	France	Possible drastic changes as a result of the Algerian situation.
5	Belgium	Possible drastic changes from the impact of the Congo situation on Belgium.
12	Finland	Possible conversion of Finland to satellite status.
20	Albania	Developments as a result of support by the Albanian regime for Communist China in the Sino-Soviet dispute.
27	Turkey	Situation still fluid as a result of Army take-over, but major changes can occur.
33	Iran	Although not probable at this time, overthrow of the Shah could occur.
41B	South Korea	A new-type Annual is now being produced. However, some elements of instability could cause further major changes.
43B	Laos	A major explosion has occurred here, but the situation is still insufficiently clear to warrant an Annual.
43D	South Vietnam	The attempted coup failed, but conditions leading up to it have not been removed, and disruptions could occur.
48	Morocco	Major changes could occur as a result of the accession to the throne of King Mulay Hassan.
49	Libya	Major changes could occur as a result of oil developments or of the death of King Idris.
